Develop A Web Application Using Node-RED

Date	09 November 2022
Team ID	PNT2022TMID37031
	Project - IoT Based Safety Gadget For Child Safety Monitoring & Notification
Maximum Marks	2 Marks

Steps Followed:

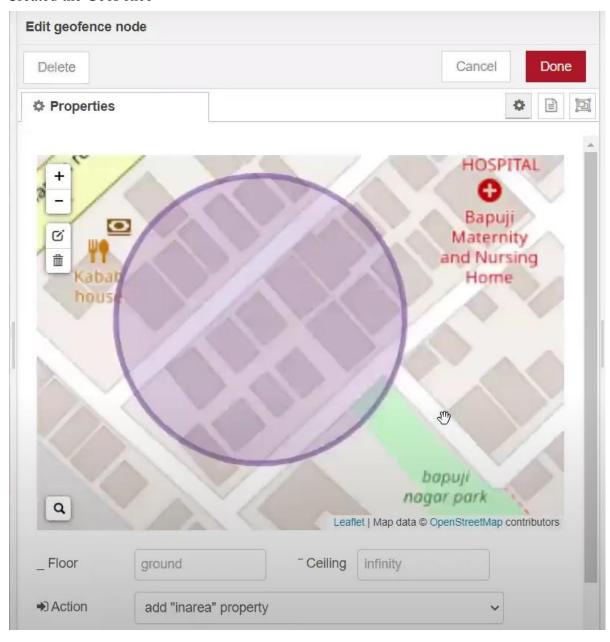

• Opened a Node-RED project

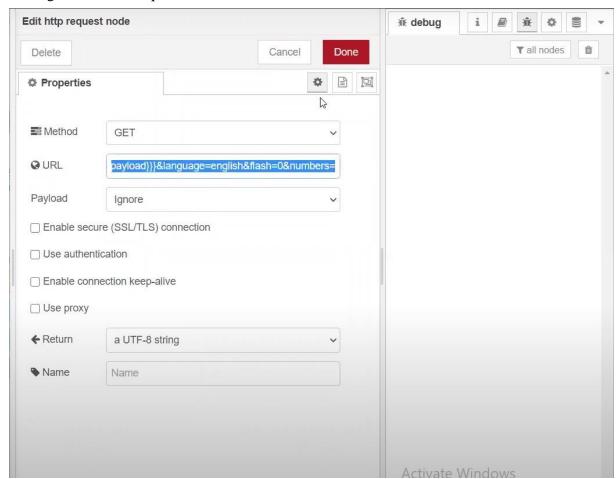

• Added code to get child location in python

```
import json
import wiotp.sdk.device
import time
myConfig = {
     "identity": {
    "orgId": "hj5fmy",
    "typeId": "NodeMCU",
    "deviceId": "12345"
      "auth": {
           "token": "12345678"
client = wiotp.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
client.connect()
While True:
          name= "Smartbridge"
          #in area location
          latitude= 17.4225176
          longitude= 78.5458842
           #out area location
          #latitude= 17.4219272
           #longitude= 78.5488783
          myData={'name': name, 'lat':latitude,'lon':longitude}
client.publishEvent(eventId="status", msgFormat="json", data=myData, qos=0, onPublish=None)
print("Data published to IBM IoT platfrom: ",myData)
          time.sleep(5)
client.disconnect()
```

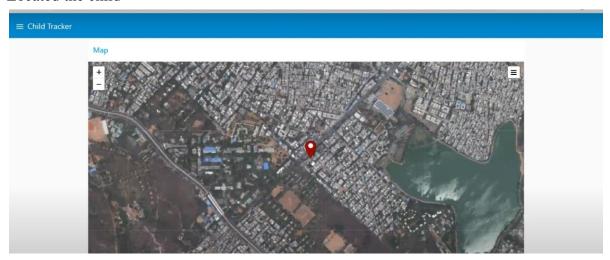

• Created the GeoFence

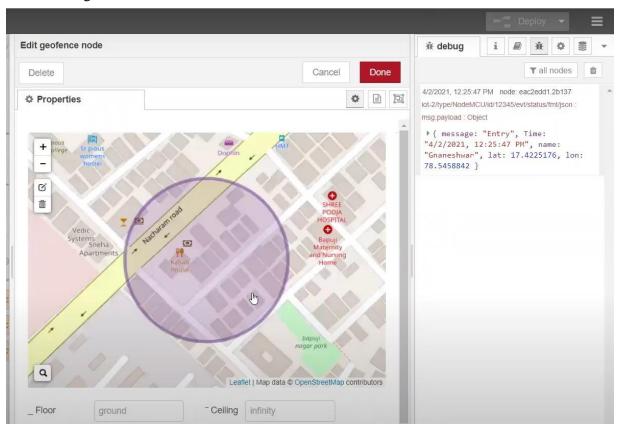

• Editing the HTTP Request URL

• Located the child

• Created the geofence node

• Python script sending requests to IBM Cloud

```
Editor - C:\Users\HP\Desktop\child.py
child.py
                                                                                                           Console 2/A 🔯
                                                                                                           Data published to IBM IoT platfrom:
